

THE WORLD'S BEST eDEMOCRACY PLATFORM FOR UNIONS

Union Voting is a joint initiative by Union Calling, Canada's leading provider of voice communication services to unions, and ScytI, the worldwide leader in secure electronic voting and electoral modernization.

“Engaging your members makes the union stronger. Members who have participated in decisions about the union's future are more committed to it.”

Bob Kinnear
President
ATU 113, Toronto Transit Workers

UNION VOTING.
THE FUTURE OF UNION DEMOCRACY.
HERE TODAY.

ASK ABOUT OUR OTHER SERVICES

VOICE BROADCASTS

Union Calling is North America's only voice broadcast service that works exclusively for unions and their allies. Use our callout service to share bargaining updates, get out the vote, announce settlements, strikes, meetings and rallies, and much more.

AUTOMATED POLLING

Our automated polling system can reach 50,000 potential respondents in just one hour and deliver results soon after. Our ultra-fast programming and design gets your poll into the field when you need it.

VIRTUAL UNION TOWN HALL

A Virtual Union Town Hall is like a radio call-in show, only better. You decide on the audience, and control every aspect of the event. We offer a stress-free complete service package.

SECURE

Scytl's multi-patented cryptographic processes provide the most secure elections possible, even more so than paper balloting.

PRIVACY

To ensure vote secrecy, information is never sent in clear text and vote decryption is carried out by breaking the correlation between the voters' identity and the votes, which guarantees voter privacy.

INTEGRITY

Votes are encrypted and digitally signed in such a manner that fully protects them against manipulation.

ONE-PERSON/ONE-VOTE

A multi-layered security system allows only one vote per digital signature, which is verified by an Electoral Board that can determine *if* someone has voted but not *how* they voted.

MULTIPLE CHANNEL VOTING

Union Voting allows voting by paper, telephone or Internet, with integrated security measures for each method.

ACCESSIBLE

VOTE ANYWHERE, ANY TIME

Union Voting allows members to vote from home, on the road, or at voting locations designated by the union. An election can be conducted over a specified period of time, with precise poll openings and closings.

MULTILINGUAL

You can conduct a vote in as many languages as you choose.

IMMEDIATE RESULTS

Voting outcomes are available virtually instantly, as soon as the polls close. Results can be announced after the supervisory body has verified them.

ECONOMICAL

Union Voting is very cost-effective for the union. Many of the costs associated with traditional paper balloting and location-dependent voting are reduced or even eliminated.

Union Voting is even more cost-effective for union members. The time taken to travel to polling locations and all the associated transportation costs simply disappear.

Contact Union Calling for a
no-obligation consultation and
estimate of your next voting event.
